

**The salad packaging
made of paper**

Here it is: The **SALAD PACKAGING** made from renewable raw materials – almost **WITHOUT PLASTICS***

for lettuce
and for lettuce
with root

**100%
recyclable**

Easy handling

for machine-based packaging systems and manual packaging

Sustainable

FSC® certified paper
(FSC®-C105659)
waterbased colours

Double glued bottom

for extra moistureproof bottom

Infinite variations

blocked for tear-off, special shapes, breathing holes and die-cut windows possible

Individual

size, form and quality can be flexibly selected

Effective advertising

up to 10 colours of high quality print – individual print from 50.000 pieces

* Unfortunately, it is not yet possible to keep the lettuce fresh for as long as in the film packaging. However, despite the "coating", the paper can be recycled without any problems and the polymers are ejected as foreign matter during recycling and disposed of properly. And so we reduce the plastic requirement for this packaging by more than 95%. That's what we call a sustainable alternative!
