

reLoc Bag for small parts
and accessories

The first **resealable** bag made from **100% paper**

reLoc Bag

THE alternative to the plastic bag

The reLoc Bag consists of two types of paper that can be collected via the paper bin and easily recycled in the existing recycling loop.

The GLASSINE paper offers sufficient TRANSPARENCY.

Glassine becomes transparent through particularly intensive "grinding" of the paper fibres and a complex mechanical smoothing process. Not as transparent as film, but you can see product features and colours.

Since glassine is expensive to produce and requires more energy than other papers, we have reduced the proportion to what is necessary. A good three quarters of the bag consists of standard paper – according to customer wishes. This also makes the bag stronger.

Thanks to the newly developed **RE-CLOSURE**, the bag is easy to open and simple to reseal again and again.

PERFECTLY COMBINED

the clever material mix of standard paper and glassine paper

CLEVER MIX OF MATERIALS

combines the advantages of both paper types and enables product view

SUSTAINABILITY

the reLoc Bag is made entirely of FSC-certified paper (FSC®-C105659) and is 100% recyclable

producing the non-transparent part ($\frac{3}{4}$) from 100% recycled paper is also possible on request

ATTRACTIVE LOOK

up to 10-colour design with water-based inks

INNOVATIVE CLOSURE

a newly developed technique allows multiple closures

TECHNICAL DATA reLoc Bag

standard size	external dimension	inner dimension	gsm
formats in mm due to a side glue seam inner and outer width are different all types made of kraft paper in white or brown + glassine 35g	100 x 110	85 x 110	50
