

reLoc Bag for small parts
and accessories

The **reclosable** bag made from **paper**

reLoc Bag

the paper-based alternative to the plastic bag

The reLoc Bag is made from two types of paper and, if correctly disposed of in the paper bin, can be recycled as waste paper in the existing recycling loop.

The GLASSINE paper offers sufficient TRANSPARENCY.

Glassine becomes transparent through particularly intensive "grinding" of the paper fibres and a complex mechanical smoothing process. Not as transparent as film, but you can see product features and colours.

Since glassine is expensive to produce and requires more energy than other papers, we have reduced the proportion to what is necessary. A good three quarters of the bag consists of standard paper – according to customer wishes. This also makes the bag stronger.

Thanks to the newly developed **RE-CLOSURE**, the bag is easy to open and simple to reclose again and again.

PERFECTLY COMBINED

the clever material mix of standard paper and glassine paper

CLEVER MIX OF MATERIALS

combines the advantages of both paper types and enables product view

CERTIFIED MATERIAL

Made from FSC®-certified paper (FSC-C105659)

the non-transparent section can be made from recycled paper on request

ATTRACTIVE LOOK

up to 10-colour design with water-based inks

INNOVATIVE CLOSURE

a newly developed technique allows multiple closures

TECHNICAL DATA reLoc Bag

standard size	external dimension	inner dimension	gsm
formats in mm due to a side glue seam inner and outer width are different	135 x 170	120 x 170	all types made of brown kraft paper 70g + glassine 35g
